

CATania 30 UP – MONTAGEANLEITUNG

Vielen Dank, dass Sie sich für dieses qualitativ hochwertige Produkt aus dem Hause Barthelme entschieden haben! Das CATania 30 UP-Profil kann bündig und nahezu ohne sichtbaren Rand in massive Wände integriert werden.

GELTUNGSBEREICH:

- 62394311 CATania 30 Unterputzprofil, Aluminium Pressblank, 1 m
- 62394312 CATania 30 Unterputzprofil, Aluminium Pressblank, 2,01 m
- 62394313 CATania 30 Unterputzprofil, Aluminium Pressblank, 3,02 m
- 62394315 CATania 30 Unterputzprofil, Aluminium Pressblank, 5,03 m
- 62394321 CATania 30 Unterputzprofil für Netzteilereinbau, Aluminium Pressblank, 1 m
- 62394322 CATania 30 Unterputzprofil für Netzteilereinbau, Aluminium Pressblank, 2,01 m
- 62394131 CATania 30 Einleger für Unterputzprofil, Aluminium Pressblank, inkl. Bohrschrauben, 1 m
- 62394132 CATania 30 Einleger für Unterputzprofil, Aluminium Pressblank, inkl. Bohrschrauben, 2,01 m
- 62394133 CATania 30 Einleger für Unterputzprofil, Aluminium Pressblank, inkl. Bohrschrauben, 3,02 m
- 62394141 Endkappenset CATania 30 Unterputzprofil, Aluminium Pressblank, 2 Stück, inkl. 12 Schrauben

IN VERBINDUNG MIT

- 6239982# CATania Abdeckung opalweiß, PMMA
- 6239985# CATania Abdeckung satiniert, PMMA
- 6239986# CATania Abdeckung klar, PMMA
- 6239987# CATania Abdeckung Prisma klar, PMMA
- 6239885# Abdeckung, Aluminium, eloxiert, z.B. zum Verbergen von Steuerungstechnik, 1 m

.....

MONTAGE UND ANSCHLUSS

Wenn Sie eine Wand mechanisch bearbeiten, so achten Sie unbedingt darauf, dass Sie keine Kabel oder Leitungen beschädigen! Zudem ist die Statik zu berücksichtigen!

Schutzhandschuhe verwenden bei der Montage!
Den Aufbau zu zweit ausführen!

Sie brauchen zusätzlich:

- » Mauernutfräse
 - » Dosenbohrer
 - » Hammer
 - » Meißel
-

MONTAGENANLEITUNG FÜR CATANIA UP

1. GEPLANTE LICHTLINIE MARKIEREN.

2. AUSSCHNITT IN ROHBAUWAND HERSTELLEN.

3. UNTERPUTZ- UND NETZTEILPROFIL AUF DIE GEWÜNSCHTE LÄNGE ZUSÄGEN UND MITTELS VERBINDER ZUSAMMENFÜGEN.

PROFILKOMBINATION SOLLTE MIN. 10 MM KÜRZER SEIN, ALS DER WANDAUSSCHNITT.

MÖGLICHE VERBINDER

62398807

62398806

62398803

62398802

4. ENDKAPPEN ANBRINGEN.

A Netzteilprofil halbseitig (bei Bedarf vorgelaserte Durchführung für Kabeinführung ausbrechen)

B Netzteilprofil komplett (bei Bedarf vorgelaserte Durchführung für Kabeinführung ausbrechen)

C Unterputzprofil

5. PRÜFEN OB DAS PROFIL LEICHGÄNGIG IN DAS MAUERWERK PASST.

6. KABEL/LEERROHR IN DAS PROFIL FÜHREN.

7. PUNKTUELL INSTALLATIONSGIPS IN MAUERWERK GEBEN.

.....

8. PROFIL EINDRÜCKEN BIS DIE FLÜGEL AM MAUERWERK ANLIEGEN (PUTZSTÄRKE = 9 MM).

Bei gewünschter Putzstärke von > 9 mm entsprechend Abstand zwischen Flügel und Mauerwerk einhalten.

.....

9. PROFIL AUSRICHTEN, GIPS AUSHÄRTEN LASSEN UND GGF. MIT SCHRAUBEN FIXIEREN ODER ZUSÄTZLICHEN GIPS AN GEEIGNETEN STELLEN ANBRINGEN.

10. SCHAUMSTOFFEINSATZ BÜNDIG IN DAS PROFIL EINDRÜCKEN.

HINWEIS: Wir empfehlen zusätzlich ca. alle 80 cm ein kurzes Stück Abdeckung zu installieren.
Dies erleichtert später das Einbringen der finalen Abdeckung.

11. WAND VERPUTZEN (BÜNDIG!)

WIR EMPFEHLEN DIE VERWENDUNG VON GIPSPUTZ.

NACH DEN VERPUTZARBEITEN SCHAUMSTOFF ENTFERNEN.

12. NETZTEIL MIT ANSCHLUSSLEITUNG ANSCHLIESSEN

ACHTUNG!

Diese Tätigkeit darf nur von einer ausgebildeten Elektrofachkraft durchgeführt werden!
Anschlußhinweise des Netzteils beachten!

13. NETZTEIL IM NETZTEILPROFIL VERSCHRAUBEN.

14. EINLEGERPROFIL AUF DIE GEWÜNSCHTE LÄNGE ZUSÄGEN (EINLEGER ÜBERDECKT NETZTEIL). BOHRUNG FÜR SPANNUNGSVERSORGUNG DES LED-STREIFENS HERSTELLEN.

15. KABEL AM LED-STREIFEN ANLÖTEN UND DURCH DAS PROFIL FÜHREN.

a

b

16. EINLEGERPROFIL IM UNTERPUTZPROFIL POSITIONIEREN UND MITTELS BEIGELEGTER BOHR-SCHRAUBEN BEFESTIGEN.

ACHTUNG!

Die Verschraubung erfolgt nicht auf Höhe des Netzteilprofils!

17. ABDECKUNG AUF DIE GEWÜNSCHTE LÄNGE SÄGEN.

18. ABDECKUNG EINCLIPSEN.

CATania 30 UP – INSTALLATION INSTRUCTIONS

Thank you for choosing this high-quality product from Barthelme! The CATania 30 UP profile can be integrated flush and with virtually no visible edge in solid walls.

SCOPE OF APPLICATION:

- 62394311 CATania 30 in-wall profile, aluminium, press finish, 1 m
- 62394312 CATania 30 in-wall profile, aluminium, press finish, 2.01 m
- 62394313 CATania 30 in-wall profile, aluminium, press finish, 3.02 m
- 62394315 CATania 30 in-wall profile, aluminium, press finish, 5.03 m
- 62394321 CATania 30 in-wall profile for power supply unit installation, aluminium, press finish, 1 m
- 62394322 CATania 30 in-wall profile for power supply unit installation, aluminium, press finish, 2.01 m
- 62394131 CATania 30 insert for in-wall profile, aluminium, press finish, incl. drilling screws, 1 m
- 62394132 CATania 30 insert for in-wall profile, aluminium, press finish, incl. drilling screws, 2.01 m
- 62394133 CATania 30 insert for in-wall profile, aluminium, press finish, incl. drilling screws, 3.02 m
- 62394141 end cap set CATania 30 in-wall profile, aluminium, press finish, 2 pieces, incl. 12 screws

IN COMBINATION WITH

- 6239982# CATania 3030 Leuchtenprofil diffuser, opal white, PMMA
- 6239985# CATania diffuser, satined, PMMA
- 6239986# CATania diffuser, clear, PMMA
- 6239987# CATania Adiffuser, prisma clear, PMMA
- 6239885# cover, aluminium, anodised, e.g. for concealing control technology, 1 m

.....

INSTALLATION AND CONNECTION

If you work mechanically on a wall, make absolutely sure that you do not damage any cables or wiring! In addition, the statics must be taken into account!

Use protective gloves during installation!
Two people should carry out the task!

You will also need:

- » slot cutter
 - » can drill
 - » hammer
 - » chisel
-

INSTALLATION INSTRUCTIONS FOR CATANIA UP

1. MARK THE PLANNED LIGHT LINE.

2. MAKE A CUT-OUT IN THE SHELL WALL.

3. CUT THE IN-WALL AND POWER SUPPLY PROFILE TO THE REQUIRED LENGTH AND JOIN THEM TOGETHER USING A CONNECTOR.

THE PROFILE COMBINATION SHOULD BE AT LEAST 10 MM SHORTER THAN THE WALL CUT-OUT.

POSSIBLE CONNECTORS

62398807

62398806

62398803

62398802

4. ATTACH END CAPS.

A Power supply unit profile half-sided (break out pre-lasered feed-through for cable entry if required)

B Power supply unit profile complete (break out pre-lasered feed-through for cable entry if required)

C In-wall profile

5. CHECK THAT THE PROFILE FITS EASILY INTO THE MASONRY.

6. GUIDE THE CABLE/EMPTY CONDUIT INTO THE PROFILE.

7. SELECTIVELY APPLY INSTALLATION PLASTER IN MASONRY.

8. PRESS IN THE PROFILE UNTIL THE WINGS ARE IN CONTACT WITH THE MASONRY
(PLASTER THICKNESS = 9 MM).

If a plaster thickness of > 9 mm is required, maintain a corresponding distance between the wings and the masonry.

9. ALIGN THE PROFILE, ALLOW THE PLASTER TO HARDEN AND, IF NECESSARY, FASTEN WITH SCREWS OR
APPLY ADDITIONAL PLASTER IN SUITABLE PLACES.

10. FIT THE FOAM INSERT FLUSH INTO THE PROFILE.

NOTE: We recommend installing an additional short piece of diffuser approx. every 80 cm.
This makes it easier to install the final diffuser later.

11. PLASTER THE WALL (FLUSH!)

WE RECOMMEND THE USE OF GYPSUM PLASTER.

REMOVE FOAM INSERT AFTER PLASTERING WORK.

12. CONNECT THE POWER SUPPLY UNIT WITH THE CONNECTION CABLE

ATTENTION!

THIS ACTIVITY MAY ONLY BE CARRIED OUT BY A TRAINED ELECTRICIAN! OBSERVE THE CONNECTION INSTRUCTIONS OF THE POWER SUPPLY UNIT!

13. SCREW THE POWER SUPPLY UNIT INTO THE POWER SUPPLY PROFILE.

14. CUT THE INSERT PROFILE TO THE DESIRED LENGTH (INSERT COVERS THE POWER SUPPLY UNIT).
DRILL A HOLE FOR THE POWER SUPPLY OF THE LED STRIP.

15. SOLDER THE CABLE TO THE LED STRIP AND ROUTE IT THROUGH THE PROFILE.

a

b

16. PLACE THE INSERT PROFILE IN THE IN-WALL PROFILE AND SECURE IT WITH THE ENCLOSED DRILLING SCREWS.

ATTENTION!

The screw connection is not made at the height of the power supply unit profile!

17. CUT THE DIFFUSER TO THE REQUIRED LENGTH.

18. CLIP IN THE DIFFUSER.

.....

Subject to change.
